

We Breed For Next Generation

“Seamons Where Seeds & Smile Sprout Together”

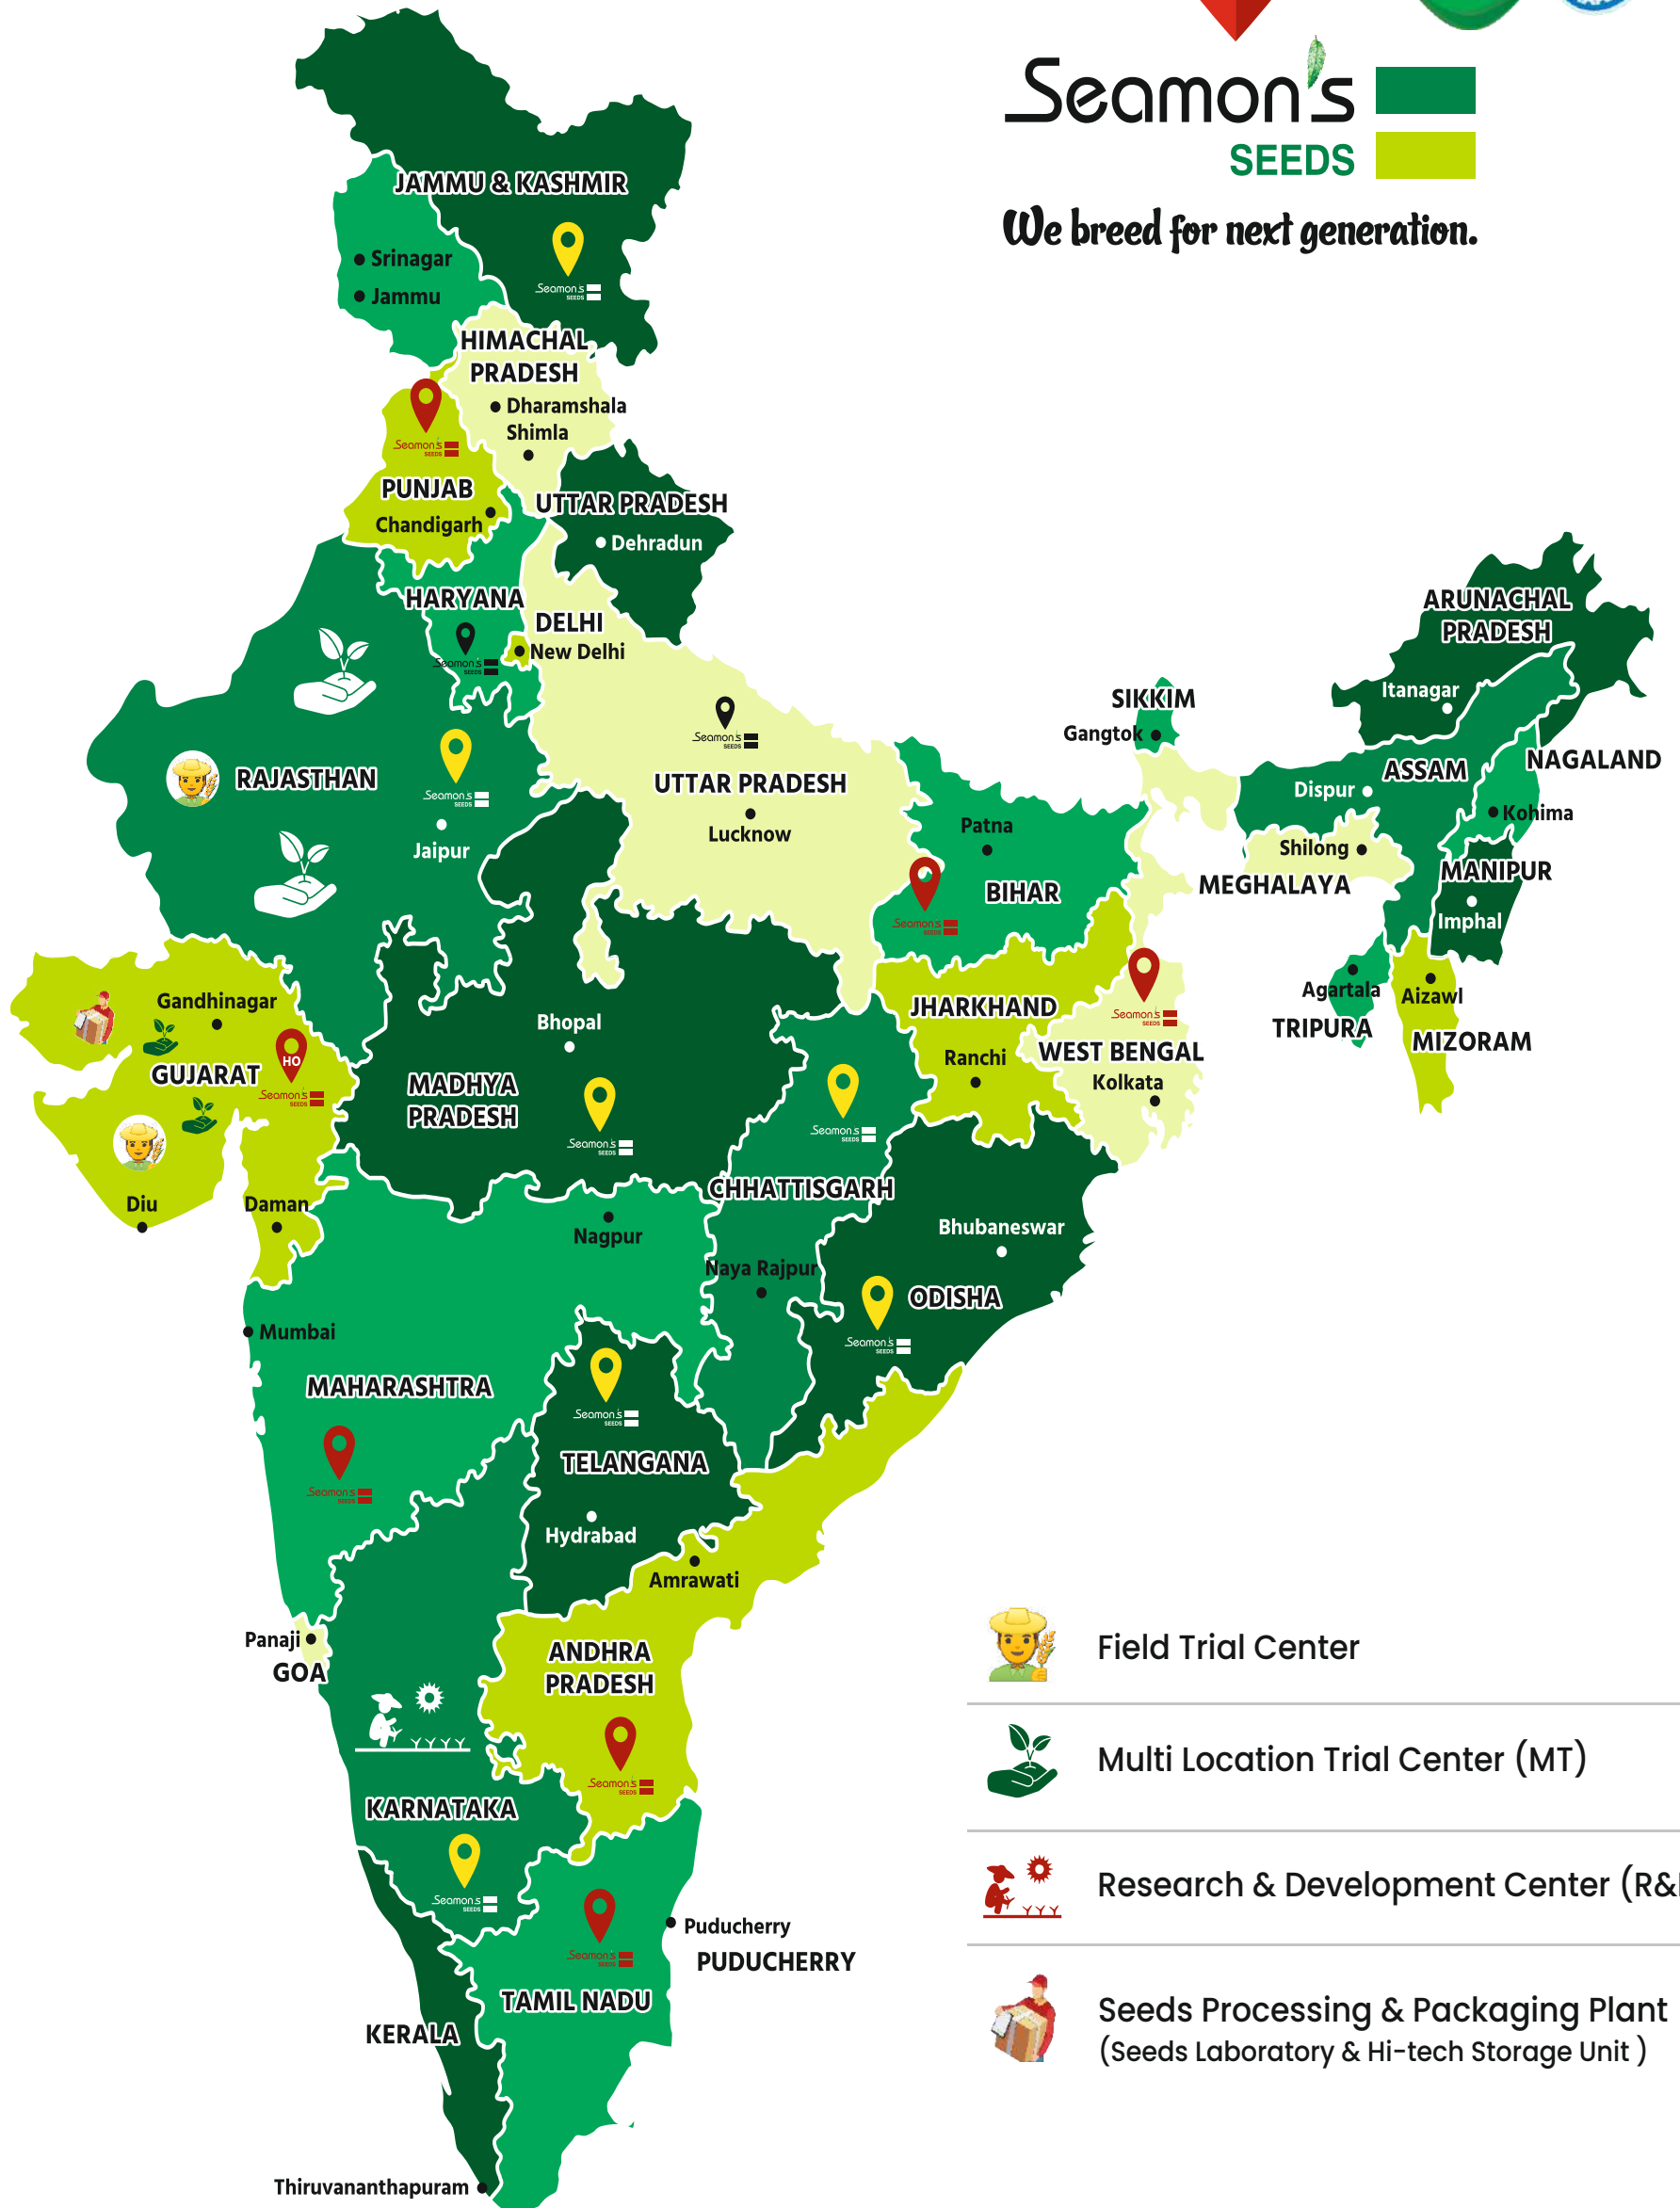

PRODUCT BROCHURE

**“SEAMONS” Stands as India’s Foremost Vegetable Seeds Company,
Pioneering Innovations and Excellence in Agriculture.**

Seamon's
SEEDS

We breed for next generation.

CEO MESSAGE

Greetings,

I hope this message finds you in good health and high spirits.

As Seamon's Seed continues to grow rapidly and set new benchmarks in Indian agriculture, I want to take a moment to express my sincere gratitude.

- **To our dedicated employees:** Your hard work and commitment drive everything we achieve.
- **To our channel partners and distributors:** Thank you for ensuring our quality seeds reach farmers far and wide. You are a vital part of our journey.

We've made significant progress in research and development, particularly in hybrid vegetable seeds. Seamons Seeds Pvt Ltd holds official DSIR recognition, validating our commitment to research-driven innovation and superior seed technology for farmers.

Looking ahead, our mission remains clear: to provide high-quality seeds that support farming communities and contribute to global food security. We are focusing on.

- Strengthening R&D to develop resilient, nutritious, and climate-smart varieties.
- Empowering farmers through education and support programs.
- Promoting sustainability to protect soil health and biodiversity.

We're also launching a new initiative to equip farmers with tools and knowledge for modern agriculture, and continuing to invest in the growth and development of our team—because your success is our strength.

Thank you once again for being part of this journey. Together, we're not just growing seeds—we're growing a better future for farmers, communities, and the planet.

Warm Regards

Mr. Narpat Singh

CEO, Seamons Seeds Pvt Ltd.

- Shape : Cylindrical long straight
- Flesh : Whitish with good crunchiness
- Plant habit : Multi fruiting with broad green leaves
- Fruit length : 19-21 Cm long uniform fruit set up

-
- Heavy fruit bearing with short internodes.
 - Perfect variety for slicing and salads.
 - Resistant to CYMV/ CVYV/ PRSV/ZYMV.
 - Easy picking and good quality.
 - Genetically devoid of bitterness.
 - Suitable for all season.
 - Very good market demand as well as gain good rate in the market.
 - Excellent kipping quality.
 - High productive capacity.
 - Highly suitable for green house poly house purpose.
 - Recommended for green house & net house purpose.

SEAMONS
MARINO SUPER

- Colour : Medium green shiny fruit
- Weight : 122-145 Gm/ fruit
- Shape : Cylindrical shape
- Flesh : Whitish with good crunchiness
- Plant habit : Multi fruiting variety with greenish broad leaves
- Fruit length : 17-20 Cm long, uniform fruit structure.

- Heavy fruit bearing with short Internodes.
- Very good for slicing and salads.
- Resistant to CYMV / CVYV / PRSV / ZYMV.
- Genetically devoid of bitterness.
- Suitable for Kharif & Summer season in India.
- Excellent kipping quality, suitable for long loading.
- High productive capacity.
- Recommended for green house & net house purpose.

SEAMONS
CAPTAIN GREEN

- Colour : Dark green shiny fruits
- Weight : 115-125 Gm / fruit
- Shape : Cylindrical long straight
- Flesh : Whitish with good crunchiness
- Plant habit : Multi fruiting with broad green leaves
- Fruit length : 19-21 Cm long uniform fruit set up

- Heavy fruit bearing with short internodes.
- Perfect variety for slicing and salads.
- Resistant to CYMV/ CVYV/ PRSV/ZYMV.
- Easy picking and good quality.
- Genetically devoid of bitterness.
- Suitable for all season.
- Very good market demand as well as gain good rate in the market.
- Excellent kipping quality.
- High productive capacity.
- Recommended for green house & net house purpose.

SEAMONS **SUPER GLORY**

- Colour : Medium green in colour
- Weight : 115-125 Gm/ fruit
- Shape : Cylindrical
- Flesh : Large lumpy & crunchy
- Plant habit : Multi fruiting with relatively broad and dark green leaves
- Fruit length : 18-20 Cm long

-
- The period from shoots to fruiting is 35-38 days.
 - Attractive uniform fruit setup.
 - Internodes are very short, heavy bearing.
 - Mid-rippling hybrid.
 - Excellent in taste.
 - Genetically devoid of bitterness.
 - Recommended for fresh consumption, preservation and salting.
 - Very well designed / breed for long transportation.
 - Suitable for all season.
 - Highly tolerant to CYMV and fusarium wilt disease.
 - Excellent production capacity.
 - Recommended for green & net house purpose.

SEAMONS **RAJDHANI- L5**

- Colour : Dark green shiny fruits
- Weight : 118-145 Gm/ fruit
- Shape : Long cylindrical shape
- Flesh : Whitish with good crunchiness
- Plant habit : Single-semi fruiting with relatively small dark green leaves
- Fruit length : 22-24 Cm long, slightly ribbed and uniform

-
- Length :- Single semi fruit bearing with short internodes.
 - Perfect variety for slicing and salads.
 - Resistant to CYMV/ CVYV/ PRSV/ZYMV.
 - Easy picking and good quality.
 - Genetically devoid of bitterness.
 - Highly recommended for Winter season.
 - Very good market demand as well as gain good rate in the market.
 - Excellent kipping quality.
 - High productive capacity.
 - Recommended for green house & net house purpose.

SEAMONS RAJA GREEN

- Colour : Shiny green in colour single-semi fruiting
- Weight : 110-130 Gm / fruit
- Shape : Cylindrical long straight
- Flesh : Large lumpy & crunchy
- Plant habit : single-semi fruiting, open type with relatively small leaves
- Fruit length : 21-24 Cm length , 2.7-3 cm diameter

- The period from shoots to fruiting is 30-32 days.
- Resistant to CYMV/CVYV/PRSV/ZYMV.
- Easy picking and good quality.
- Genetically devoid of bitterness.
- Suitable for Winter season.
- Excellent keeping quality.
- High productive capacity.
- Recommended for green house & net house purpose.

SEAMONS ROCKSTAR

- Colour : Shiny green in colour multi fruiting.
- Weight : 130-150 Gm / fruit
- Shape : Cylindrical long straight
- Flesh : Large lumpy & crunchy
- Plant habit : Multi fruiting, with relatively small dark green leaves
- Fruit length : 19-20 Cm length

- The period from shoots to fruiting is 32-35 days.
- Resistant to CYMV/CVYV/PRSV/ZYMV.
- Easy picking and good quality.
- Genetically devoid of bitterness.
- Recommended for Summer season.
- Excellent keeping quality.
- High productive capacity.
- Recommended for green house & net house purpose.

SEAMONS
MEERA

- Colour : Green in colour with light white stripes.
- Weight : 100-125 Gm/ fruit
- Shape : Cylindrical
- Flesh : Large lumpy & crunchy
- Fruit length : 18-20 Cm long

- The period from shoots to fruiting is 32-35 days.
- Attractive uniform fruit setup.
- Internodes are very short.
- Mid-rippling hybrid.
- Excellent taste.
- Genetically devoid of bitterness, recommended for open cultivation.
- Recommended for fresh consumption, preservation and salting.
- Very well designed for long transportation.
- Suitable for all late Rabi and early Summer and mid Monsoon.
- Highly tolerant to CYMV and fusarium wilt disease.
- Excellent production capacity.

SEAMONS
NANCY
GREEN EXPRESS

- Colour : Dark green shiny fruits
- Weight : 110-140 Gm/ fruit
- Shape : Cylindrical shape
- Flesh : Whitish with good crunchiness
- Plant habit : Multi Fruiting, open type with relatively small leaves
- Fruit length : 16-18 Cm long, slightly ribbed and uniform

- Heavy fruit bearing with short internodes.
- Perfect variety for slicing and salads.
- Resistant to CYMV/ CVYV/ PRSV/ ZYMV.
- Easy picking and good quality.
- Genetically devoid of bitterness.
- Suitable season is jan-feb, march-april recommended for open cultivation.
- Very good market demand as well as gain good rate in the market.
- Excellent kipping quality.
- High productive capacity.
- Recommended for open field.

SEAMONS
NANCY
WHITE EXPRESS

- Colour : White (inside), whitish (outer)
- Weight : 85-120 Gm/ fruit
- Shape : Cylindrical
- Flesh : Large lumpy & crunchy
- Fruit length : 17-20 Cm long

- The period from shoots to fruiting is 40-42 days.
- Attractive uniform fruit setup and early variety.
- Internodes are very short.
- Mid-rippling hybrid.
- Excellent taste.
- Genetically devoid of bitterness, recommended for open cultivation.
- Recommended for fresh consumption, preservation and salting.
- Very well designed for long transportation.
- Suitable for all season.
- Highly tolerant to CYMV and fusarium wilt disease.
- Excellent production capacity.

SEAMONS
STAR GLORY

- Colour : Dark green shiny fruits
- Weight : 120-140 Gm/ fruit
- Shape : Cylindrical shape
- Flesh : Whitish with good crunchiness
- Plant habit : Multi fruiting, open type with broad leaves
- Fruit length : 18-20 Cm long

- Heavy fruit bearing with short internodes.
- Very good for slicing and salads.
- Resistant to CYMV / CVYV / PRSV / ZYMV.
- Genetically devoid of bitterness.
- Suitable for Rabi & Summer season in India.
- Excellent keeping quality, suitable for long loading.
- High productive capacity.
- Recommended for green house & net house purpose.

SEAMONS GREEN ZONE

- Colour : Medium Dark green shiny fruits
- Weight : 110-115 Gm/ fruit
- Shape : Cylindrical medium long straight
- Flesh : Whitish with good crunchiness with good aroma
- Plant habit : Multi fruiting with medium broad green leaves.

-
- The period from shoots to fruiting is 32-35 days.
 - Attractive uniform fruit setup.
 - Internodes are very short.
 - Mid-ripping hybrid.
 - Excellent taste.
 - Genetically devoid of bitterness, recommended for open cultivation.
 - Recommended for fresh consumption, preservation and salting.
 - Very well designed for long transportation.
 - Suitable for all late Rabi and early Summer and mid Monsoon.
 - Highly tolerant to CYMV and fusarium wilt disease.
 - Excellent production capacity.

SEAMONS GREEN GLORY PLUS

- Colour : Moderate green shiny fruit
- Weight : 122-142 Gm/ fruit
- Shape : Cylindrical shape
- Flesh : Whitish with good crunchiness
- Plant habit : Multi fruiting variety with greenish broad leaves
- Fruit length : 18.5-20.5 Cm long, uniform fruit structure.

-
- Heavy fruit bearing with short Internodes.
 - Very good for slicing and salads.
 - Resistant to CYMV / CVYV / PRSV / ZYMV.
 - Genetically devoid of bitterness.
 - Suitable for Rabi, Kharif & Summer season in India.
 - Excellent kipping quality, suitable for long loading.
 - High productive capacity.
 - Highly suitable for green house poly house purpose.
- Recommended for green house & net house purpose.

- **Fruit Appearance** : It produces uniform, cylindrical fruits that are medium to dark green in colour.
- **Size and Weight** : The fruits typically grow to a length of 18–20 cm and a diameter of 4–5 cm, weighing approximately 140–170 grams.
- **Texture and Taste** : It is known for its crispy texture and is typically bitter-free, making it ideal for salads and fresh consumption.
- **Plant Vigor** : The plant is a vigorous vine with strong branching and high foliage density.
- **Maturity** : It is an early-maturing variety, with the first harvest (picking) usually occurring within 38 to 45 days after sowing.
- **Disease Resistance** : It features intermediate resistance to the Tomato Leaf Curl New Delhi Virus (ToLCNDV) and other common viral infections.

Cultivation Details

- **Best Growing Season** : It can be grown year-round in tropical conditions, but the optimum months for sowing are often noted as April to June.
- **Suited For** : This variety is suitable for both open-field cultivation and protected structures like greenhouses.
- **Vigour and Habit** : It is a very vigorous vine with strong branching and high foliage density. Research has shown it can produce more primary branches (averaging 6.27 per vine) compared to many other genotypes.
- **Yield Potential** : It is characterized by high productivity. In field trials, it has achieved significantly higher yields than competing varieties, reaching up to 43.64 kg per plot or approximately 326.40 q/ha.
- **Harvest Frequency** : Farmers are advised to harvest every second or third day to maintain optimal fruit quality and thickness.
- **Physical and Sensory Traits**
 - **Surface Texture** : The fruit is typically smooth-skinned and glossy, though some variants are described as having light green stripes.
 - **Bicolour Appearance** : Some versions of the Nazia are classified as a "bicolour" type, featuring green skin with light green stripes.
 - **Nutritional Quality** : It is noted for a high ascorbic acid (Vitamin C) content (approx. 1.63 mg/100g), which aids in better colour and flavour retention.
 - **Flavour** : It is bred to be bitter-free and possesses a crisp, tender texture suitable for fresh consumption.

“SEAMON’S CHILLIS”

Fiery Heat, Explosive Flavor !

SEAMONS ROZY

- Colour : Shiny green in colour
- Length : 17-24 Cm
- Diameter : 1-1.1 Cm
- Plant habit : Umbrella type plant

- Gain good weight fruit.
- Wrinkled with good length.
- Heavy fruit bearing.
- Rozy is special chilli for Summer & early Winter cultivation.
- Rozy survive up to 48 degree temperature.
- In summer length of Rozy will not decrease it remains as it comes in another season.
- Highly resistant to mosaic virus and anthregnose, nematodes as well as tolerant to sucking pests.
- Medium pungent with good aroma.
- Farmer benefit is less expense with high yield.
- Excellent for export quality & keeping quality.
- Farmers will get a much more rate in mandi's than other chilli.
- Suitable for all seasons.
- High-yielding capacity.

SEAMONS ROZY 5G

- Colour : Dark green in colour
- Length : 8-10 Cm
- Diameter : 0.9-1 Cm
- Plant habit : Umbrella type plant

- Gain good weight Fruit.
- No wrinkled with good length.
- Rozy 5G SHU - 40000-44000.
- Rozy 5G is the G4 type of segment that has the great ability of production.
- Moderately resistant to mosaic viruses and nematodes as well as
- moderately tolerant to sucking pests.
- High pungent with a good aroma.
- Excellent for export quality & keeping quality.
- Very good market Adaptability.
- Suitable for Summer & early Rabi seasons.
- High-yielding capacity.

SEAMONS
FIRE-50

- Colour : Attractive dark green in colour turns into glossy red colour
- Length : 8-10 Cm
- Diameter : 0.8-1.00 Cm
- Plant habit : Vigorous plant with good standing height

- Suitable for dual purpose, gain good fruit weight.
- Slight wrinkled.
- Fire-50 SHU- 38000-40000.
- Fire-50 is a very good hybrid for late Rabi & early Summer cultivation.
- Fire-50 is the G4 type of segment that has the great ability of high production.
- In summer length of Fire-50 will not decrease.
- Moderately resistant to mosaic virus.
- Moderate tolerance to sucking pests.
- High pungent with good aroma.
- Very strong semi spreading with dense foliage & very good fruit firmness.
- Excellent for export quality & keeping quality.
- Suitable for all seasons.
- High-yielding capacity.

SEAMONS
TANDAV

- Colour : Dark green , glossy red on maturity
- Length : 8-10 Cm
- Diameter : 0.9-1.00 Cm
- Plant habit : Umbrella type plant

- Use :- Suitable for both dry and green.
- Pungency :- High pungent.
- Tandav SHU - 40000-41000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm.
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3.5-4 feet(RR), 1-1.5 feet (PP).
- Other :- Long self life, tolerant to draught and powdery mildew fruit surface moderate wrinkles.

- Colour : Dark green in colour, turns glossy on maturity
- Length : 8-9 Cm
- Diameter : 0.8-0.9 Cm
- Pungency : High pungent

- Use :- Suitable for both red and green.
- Laxmi SHU 35000-38000.
- Sowing season :- Suitable for Kharif-Summer.
- Depth of sowing :- Less then 1 cm.
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-3.5 feet (RR), 1-1.5 feet (PP).
- Other :- Has high cops, good resistant power against viral disease.
high yielding , fruit surface has moderate wrinkles.

- Colour : Dark green long turns into deep red in colour
- Length : 12-14 Cm
- Diameter : 1-1.1 Cm
- Pungency : High pungent

- Use :- Suitable for dual green and red.
- Sowing season :- Kharif & Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-3.5 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ Acre).
- Other :- For red kari chilli, very high yielding, deep red dry colour
moderate viral resistance.

SEAMONS PRATAP-2515

- Colour : Green in colour and turns into deep red colour
- Length : 8-9 Cm
- Diameter : 1-1.1 Cm
- Pungency : High pungent

- Use :- Dual purpose.
- Pratap-2515 SHU-40000-41000.
- Sowing season :- Kharif-Summer
- Depth of sowing :- Less then 1 cm.
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-3.5 feet (RR), 1-1.5 feet (PP).
- Other :- Large plant size with compact growing habit, green fruit with semi wrinkled skin surface, intermediate resistance to viral disease, high resistance to anthracnose.

SEAMONS NEPOLEAN-5525

- Colour : Medium green and turns into shiny red
- Length : 12-14 Cm
- Diameter : 1.2 Cm
- Pungency : Medium to high pungent

- Use :- For dual purpose.
- Nepolean-5525 SHU-40000-42000.
- Sowing season :- Kharif & Summer.
- Depth of sowing :- Less then 1 cm.
- Sowing method :- Transplanting of seedling.
Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP).
- Other :- Average yield in green (14-15 MT) in red (1.5-2 MT), good plant stand early variety with high yielding, deep bright red dry with No wrinkles.

SEAMONS

SEAMONS DELUXE

- Colour : Medium green turns into deep red colour
- Length : 12-13 Cm
- Diameter : 1.3-1.4 Cm
- Pungency : High pungent

- Use :- Suitable for green and red.
- Seamons deluxe SHU-40000-41000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-3.5 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ Acre).
- Other :- Traditional byadgi type fruit,early picking,very good colour retention, high market preference for powder & oleoresin.

SEAMONS

PUSHPAK-341

- Colour : Light to medium green turns into shiny red in colour
- Length : 10-12 Cm
- Diameter : 1.3-1.4 Cm
- Pungency : Medium to high pungent

- Use :- For dual purpose (red & green purpose).
- Pushpak-341 contain SHU- 40000-42000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ Acre).
- Other :- Early variety with semi erect plant, high yielding with brilliant dry red chilli, highly resistant to anthracnose.

SEAMONS **HITLER-243**

- Colour : Green in colour, turns into deep red
- Length : 12-13 Cm
- Diameter : 1.2-1.4 Cm
- Pungency : High pungent

- Use :- For dual purpose (red purpose).
- Hitler-243 SHU- 42000-44000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ Acre).
- Other :- Excellent plant vigour, robust and erect plant habit, long and thick fruit, uniform drying and high circular wrinkle, Moderate resistant to anthracnose.

SEAMONS **HOT SHOT**

- Colour : Fresh fruits of shiny greenish in colour
- Length : 13-15 Cm
- Diameter : 1.3-1.4 Cm
- Pungency : Medium to high pungent

- Use :- For dual purpose (green / red purpose).
- Hot-Shot SHU 37000-39000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ Acre).
- Other :- Large plant with erect growing habit ,
early maturity, semi wrinkle fruit , intermediate
resistant to bacterial Wilt and CLV, moderate resistant to
anthracnose.

SEAMONS GUJARAT EXPRESS

- Colour : Yellowish green colour turns into deep red colour
- Length : 14-15 Cm
- Diameter : 1.1-1.2 Cm
- Pungency : Medium high pungent

- Use :- For dual purpose (green / red purpose).
- Gujarat Express SHU-37000-38000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ acre).
- Other :- Erect growing habit, fruits are pendent , high yielding with intermediate resistant to viral and bacterial diseases, high resistant to anthracnose.

SEAMONS BULLET RAJA

- Colour : Attractive dark green in colour
- Length : 8-9 Cm
- Diameter : 1 Cm
- Pungency : High pungent

- Use :- Suitable for deep red glossy red drying chilli.
- Bullet Raja SHU-40000-41000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Dowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ Acre).
- Other :- Good keeping quality, and high bearing ,
tolerant to leaf curl virus, first picking
start 45-50 days, highly resistant to anthracnose.

SEAMONS TAMANNA

- Colour : Light green fruit turns into deep red colour
- Length : 10-11 Cm
- Diameter : 1.4 Cm
- Pungency : Medium high pungent

- Use :- Suitable for green and red.
- Tamanna SHU-39000-40000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-3.5 feet (RR), 1-1.5 feet (PP)
(9000 to 10000 seeds/ Acre).
- Other :- High yielding variety, strong branches, first harvest 50-55 days virus and heat tolerant, tall erect plant, moderate resistant to anthracnose.

SEAMONS BIJLI

- Colour : Dark green in colour , deep red on maturity
- Length : 9-10 Cm
- Diameter : 0.8-0.9 Cm
- Pungency : High pungent

- Use :- Suitable for green and red.
- Bijli SHU-40000-41000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-3.5 feet (RR), 1-1.5 feet (PP)
(9000 to 10,000 seeds/ Acre).
- Other :- Fruit surface is moderately wrinkles, excellent fruit size, uniformity, highly viral tolerance, highly tolerant to anthracnose.

SEAMONS 1525

- Colour : Dark green colour turns into deep red colour
- Length : 8-10 Cm
- Diameter : 0.9-1.00 Cm
- Pungency : Very high pungent

- Use :- For dual purpose (green / red purpose).
- SEAMONS 1525:- SHU-48000-49000.
- Sowing season :- Kharif-Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP) (9000 to 10000 seeds/ acre).
- Best G4 type chilli and highly recommended for export.
- Other :- Erect plant growing habit, fruits are pendent , high yielding with high resistant to viral and bacterial diseases, high resistant to anthracnose.

SEAMONS

SUGANDH-2222

- Colour : Dark green colour turns into deep red colour
- Length : 9-11 Cm
- Diameter : 0.9-1.00 Cm
- Pungency : High pungent

- Use :- For dual purpose (green / red purpose).
- SUGANDH-2222 :- SHU-45000-46000.
- Sowing season :- Kharif-Early Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm /Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP) (9000 to 10000 seeds/ acre).
- Best G4 type chilli and highly recommended for export and powder purpose usage.
- Other :- Plant growing with multiple branches, fruits are pendent , high yielding with high resistant to viral and bacterial diseases, high resistant to anthracnose.

SEAMONS **PUSHPA**

- Colour : Shiny Parrot Green In Colour and turn Deep Glossy Red With no wrinkle.
- Length : 14-15 Cm
- Diameter : 1.1-1.3 Cm
- Pungency : High pungent

- Purpose :- Can Use for Dual Purpose. Highly Recommended for Green as well as Dry Purpose.
- Use :- Can Use for Curry / Fresh Veggie, also Can Use For Dry chilly Purpose.
- Pushpa SHU – 68000-69000
- Sowing Season :- Recommended for Kharif/Summer/Monsoon Season.
- Depth Of Sowing :- Less then 1 cm (95-100 gm/ Acre seeds)
- Sowing Method :- Transplanting of Seedling.
- Sowing spacing :- 3.5-4.5 feet (RR), 1-1.5 feet (PP) (10000 to 11000 seeds/acre).
- Other :- Bushy Plant with Heavy bearing and good growing habit, fruits are pendent , high yielding with High resistant to viral and bacterial diseases, high Tolerant to anthracnose.

SEAMONS -650

- Colour : Light shiny green to Dark green in colour with semi spreading plant.
- Length : 14-15 Cm
- Diameter : 2.5-2.8 Cm
- Pungency : Medium pungent pepper

- Use :- For green bhaji purpose / picking fresh.
- Seamons -650 :- SHU-22000-23000.
- Sowing season :- Kharif-Early Summer.
- Depth of sowing :- Less then 1 cm (90-100 Gm / Acre seeds).
- Sowing method :- Transplanting of seedling.
- Sowing spacing :- 3-4 feet (RR), 1-1.5 feet (PP) (9000 to 10000 seeds/ acre).
- Best green type chilli and highly recommended for export.
- Other :- Plant growing with multiple branches with early maturity, fruits are shiny , high yielding with high resistant to viral and bacterial diseases, high resistant to CYMV.

“TANGY TOMATO”

Nature's Perfect Balance
of Sweet and Tangy!

SEAMONS **BHUMIKA**

- Plant habit : Large determinate plants
- Shape : Flat round in shape
- Fruit weight : 80-90 Gm with a sour taste

- Harvest the fruit at the time of physiological maturity.
- Picking can start by 65-70 days after transplantation.
- Firm fruit, with heavy fruit bearing.
- Plant Type :- Vigorous plant with good standing height.
- Seed rate :- 40-50 Gm / Acre.
- Bhumika is a very good hybrid for all-season cultivation.
- Average yield 28-45 Mt/Acre (depend on season).
- Uniform fruits quality in each picking for all season.
- Highly tolerant to high temperature.
- Suitable for all three season.
- Resistance to ToLCV with high yielding capacity.

SEAMONS **LAL BADSHAH**

- Plant habit : Determinate , open plant vigor and stay green plant
- Shape : Oval to elongated shape
- Fruit weight : 90 to 100 Gms.

- Maturity Days :- First picking after 55-60 days after transplanting
- Firm Fruit, uniform green color to deep red at maturity
- Very Good Adaptability
- Heavy Fruit Bearing
- Lal Badshah is a very good hybrid for Kharif and Rabi Season.
- Intermediate resistant against ToLCV
- Shelf Life :- Approximate 12-14 days
- Suitability :- Excellent firmness makes it ideal for long-distance transport and fresh markets
- High Yielding Capacity

SEAMONS **ABHISAR**

- Plant habit : Determinate and vigorous plant
- Shape : Round shape
- Fruit weight : 90-100 Gm with a sour taste

-
- Maturity days 60-65 days.
 - Very firm and uniform size.
 - Very good adaptability.
 - Very good longevity and high yield crop.
 - Abhisar is a very good hybrid for Monsoon & Rabi cultivation.
 - Abhisar is its type of segment that having the great ability for production.
 - Excellent heat resistance Variety.
 - Highly resistance to ToLCV.
 - High yielding capacity.

SEAMONS **VIKRANT**

- Plant habit : Strong, semi-determinate plant
- Shape : Elongated square shape
- Weight & Color : Medium-sized fruits weighing 90 to 100 grams with a vibrant, deep red color

-
- Firmness: Features ultra-firm fruit texture, making it highly resistant to damage during long-distance transportation and export.
 - Maturity: Ready for first picking/harvest about 60 to 65 days after transplanting.
 - Climate Adaptability: Performs exceptionally well in hot summer climates.
 - Disease Resistance: Known for a high level of disease resistance, significantly reducing the risk of crop loss.
 - Sowing Windows: Can be grown across Kharif, Rabi, and Summer seasons depending on the region.

SEAMONS

VASCO-09

- Plant habit : Strong, vigorous plants that produce firm fruits with excellent shelf-life and transportability.
- Shape : Uniform square-round shape with a deep, glossy, and attractive red color.
- Size & Weight : Compact fruits weighing exactly 90-100 grams

- Maturity Period: Early maturing, typically ready for harvest 60-65 days after transplanting.
- Firmness & Shelf-Life: The fruits are dense and ultra-firm, making them highly resistant to cracking and ideal for long-distance transport to various regional markets.
- High Yield: Known for producing consistent clusters of marketable tomatoes.
- Adaptability: Performs well in warm, hot climates, which suits agricultural zones across India.

SEAMONS

VINAYAK

- Plant habit : Strong, vigorous indeterminate plants with heavy fruit loads
- Shape : Uniformly flat round
- Fruit weight : 90 gm to 110 gm per fruit.

- Color : Large, and bright, deep-red color.
- Firmness: Very firm, making it ideal for transport and storage.
- Yield: Known for heavy, consistent yields even in the final pickings.
- It thrives in both open field and greenhouse condition.
- Maturity: Medium maturity, typically ready for harvest 65 to 70 days after transplanting.
- Habit: Indeterminate, allowing for an extended harvesting period.
- Cultivation: Highly adaptable and suited for both open field and greenhouse or net-house farming.
- High Resistance: ToMV (Tomato Mosaic Virus), Fusarium Wilt (Races 1 & 2), and Verticillium Wilt.
- Intermediate Resistance: TYLCV (Tomato Yellow Leaf Curl Virus), Late Blight, Bacterial Wilt, Leaf Mold, and Root-knot Nematode.

“KRISHNA OKRA”

Wonderful – Delightfully Fresh,
Wonderfully Flavourful!

SEAMONS
KRISHNA-25

- Colour : Attractive dark green, thick and pentagonal long fruits
- Length : 15-16 Cm
- Suitable : Kharif-Rabi-Summer

-
- Tall and vigorous plant.
 - Very good average fruit weight.
 - Very good crop longevity.
 - Short internodes , production capacity very high.
 - Suitable for all okra growing area and season.
 - Very high resistance against Y.V.M.V. disease.
 - Vigorous plant with good multiple branches.
 - Highly suitable for long transportation.
 - Good keeping quality.

SEAMONS
ANGARA-2535

- Colour : Attractive green colour with excellent fruit quality
- Length : 14-16 Cm
- Suitable : Kharif-Summer

-
- Tall vigorous plant.
 - The dark green thick pentagonal shape.
 - Fruit weight is very good.
 - High yield with Short internodes and good branches.
 - Suitable for all okra growing season.
 - Good for all season cultivation.
 - High resistance against Y.V.M.V. disease.
 - Multiple branching habit, suitable for all kind of soil.
 - Highly suitable for long-distance market.
 - Very good keeping quality.

SEAMONS **SARGAM**

- Colour : Dark green and glossy fruits pentagonal, medium thick,
- Length : 12-14 Cm
- Suitable : Kharif, Rabi & early Summer

-
- Very good crop longevity.
 - High yielding.
 - Suitable for all okra growing season.
 - Good for all season cultivation.
 - High resistance against Y.V.M.V. disease.
 - Vigorous plant with short internodes.
 - Multiple branch habits.
 - Highly suitable for long-distance market.
 - Very good keeping quality.

SEAMONS **NARMADA**

- Colour : Attractive dark green, thick to medium thick pentagonal Shape
- Length : 14-15 Cm
- Suitable : Winter-Kharif

-
- Long fruits, tall and vigorous plant.
 - Medium to good branches.
 - Very good crop longevity.
 - High yield and short internodes.
 - Suitable for all okra growing season.
 - Good for all season cultivation.
 - High resistance against Y.V.M.V. disease.
 - Vigorous plant with short internodes and multiple branching.
 - Highly suitable for long-distance market.
 - Very good keeping quality.

SEAMONS ANAMIKA

- Colour : Attractive dark green, slim and pentagonal long fruits
- Length : 14-15 Cm
- Suitable : Kharif-Rabi-Summer

-
- Tall and vigorous plant.
 - Very good average fruit weight.
 - Very good crop longevity.
 - High yield and short internodes.
 - Suitable for all okra growing season.
 - Good for Rabi season cultivation.
 - High resistance against Y.V.M.V. disease.
 - Vigorous plant with short internodes and multiple branching.
 - Highly suitable for long distance market.
 - Very good keeping quality.

SEAMONS GAYATRI

- Colour : Attractive dark green, thick and pentagonal long fruits
- Length : 10-12 Cm
- Suitable : Kharif-Rabi & early Summer

-
- Tall and vigorous plant.
 - Very good average fruit weight.
 - Very good crop longevity.
 - Short internodes , production capacity very high.
 - Suitable for all okra growing area and season.
 - Very high resistance against Y.V.M.V. disease.
 - Vigorous plant with good multiple branches.
 - Highly suitable for long transportation.
 - Good keeping quality.

“SEAMON’S GOURDS”
Crisp Freshness, Perfectly Picked!

SEAMONS CHARLIE

- Colour : Dark green with thrones
- Length : 8-10 Cm
- Plant vigor : Strong with prolific bearing

- High yield with good crop longevity.
- Suitable for long transportation.
- Suitable for Kharif-Rabi-early Summer.
- Attractive dark green fruits.
- Promising variety for long transport and export.
- First Picking can be done at 45-50 days.

SEAMONS SHAKTI

- Colour : Dark green thrones
- Length : 12-14 Cm
- Capacity : High yielding capacity

- Very good unique compact size that gives advantage to farmer.
- Suitable for long transportation and export.
- Very strong against leaf curl virus and powdery mildew.
- Very good preference of traders in market.
- First picking can be done at 50-55 days.
- Fruit structure is very firm.
- Fruit size will be consistent uniform from first harvest to last picking.

SEAMONS ARJUN

- Colour : Attractive, dark green and uniform fruits
- Length : 12-14 Cm
- Plant vigor : Healthy and vigorous vine

-
- Very good crop longevity.
 - Suitable for Kharif-Rabi-early Summer.
 - Thrones are tough and very good for long transportation.
 - Prolific bearing with high yield capacity.
 - High resistance against fusarium wilt disease.
 - Suitable for all bitter gourd growing areas.

SEAMONS ATHARVA

- Colour : Dark green
- Length : 14-18 Cm
- Capacity : High yielding capacity

-
- Strong and sturdy vines with prolific bearing.
 - Attractive, glossy, contain thrones & uniform fruits.
 - Prolific bearing with easy marketability.
 - Very good shipping and keeping quality.
 - Very good for all bittergourd growing areas.
 - Suitable for Kharif-Rabi-early Summer.
 - Moderate resistant against B.Y.M.V. and wilt.

SEAMONS **DURGA**

- Colour : Dark green fruit colour with shiny ridges
- Length : 18-24 Inches
- Plant vigor : Vigorous and sturdy vine with good crop longevity

- Medium early maturity with high yielding capacity.
- Fruit shape is straight and cylindrical.
- Very good for export prupose.
- Suitable for Kharif-Rabi-Summer.
- Suitable for all gourds growing area and season.
- Highly recommended for long distance transportation and export.
- Very high resistancy against viral disease.
- It can fetch very good rate in market.
- Weighing around 250-300 gm.

SEAMONS **GOMTI**

- Colour : Slender, straight, medium green attractive fruits
- Length : 18-22 Inches
- Plant vigor : Vigorous vine with prolific bearing

- Very early maturity with high yield.
- Good shipping and keeping quality.
- Highly suitable in Kharif-Rabi-early Summer.
- Suitable for all growing seasons of ridge gourd.
- Highly resistant against viral and wilt.
- Medium green shiny colour.
- Fetching good market rate.
- Gomti weighing 250-300 gm.

SEAMONS **SACHIN**

- Colour : Green, straight, glossy and uniform medium long fruits
- Length : 20-24 Inches
- Plant vigor : Vigorous and sturdy vine with good crop longevity

-
- Early maturity with high yield.
 - Good shipping and keeping quality.
 - Suitable for Kharif-Rabi.
 - High yielding product.
 - Suitable for long transportation.
 - Highly resistant to sucking pests and viral disease.
 - Fetching a good market rate.
 - Sachin weighing 200-300 gm.

SEAMONS **ALISHA**

- Colour : Dark green fruit colour with shiny ridges
- Length : 18-24 Inches
- Plant vigor : Vigorous and sturdy vine with good crop longevity

-
- Medium early maturity with high yielding capacity.
 - Fruit shape is straight and cylindrical.
 - Very good for export prupose.
 - Suitable for Rabi & Summer season.
 - Suitable for all gourds growing area.
 - Highly recommended for long distance transportation.
 - Moderate resistance against viral disease.
 - It can fetch very good rate in market.
 - Weighing around 250-300 gm.

SEAMONS
SAKSHI

- Colour : Green colour with shining fruits
- Length : 12-18 Cm
- Plant vigor : Prolific bearing with high yield

-
- Very strong, vigorous vine with multiple branches.
 - Mid early maturity, continuous and prolific bearing.
 - Straight, cylindrical & uniform fruits.
 - Suitable for long-distance shipping with good keeping quality.
 - Highly resistant against viral and wilt disease.

SEAMONS
SANJIVNI

- Colour : Light green smooth skin
- Length : 35-40 Cm
- Plant vigor : Strong, vigorous vine with more branches

-
- Early maturity, continuous and prolific bearing.
 - Straight, cylindrical and attractive green fruits.
 - Suitable for long distance shipping with good keeping quality.
 - Suitable for all growing seasons of bottle gourd.
 - Moderate resistance against wilt and sucking pests.

- Colour : Shiny green, smooth and uniform fruits
- Weight : 45-50 Gm
- Plant vigor : Plant strength is very strong

- Fruit shape is round.
- Fruit flesh is white in colour with wonderful taste.
- First harvest 45-50 days after sowing.
- High fruit setting ability.
- Very good for long transportation.
- High productivity.
- Tolerant to viral disease.
- Very good market demand.

- Colour : Straight, attractive, glossy, thin long and dark fruits
- Length : 20-25 Cm
- Plant vigor : Very vigorous vine with prolific bearing

- Heavy yield.
- Good keeping quality.
- Good field tolerance for foliar disease.
- Very good variety for all growing season.
- Good shipping quality.

SWEET CORN

“Pure Sweetness in Every Bite”

SEAMONS SWEET BABBY

- Colour : Golden yellow kernels
- Weight : 225-250 Gm
- Shape and size : Long uniform cylindrical cobs, excellent tip filling
- Ear diameter : 1.8-2 Inch
- Ear length : 8-8.5 Inch

- Yield :- 55000-60000/ Hectare.
- Seed count /kg - 7500-7600.
- Rows :- 14-16 Kernels.
- Silking :- 50% Silking in 48-50 days.
- Brix :- 15-16.4%.
- Maturity days:- 70-72 Days.
- Seed rate :- 2-2.5 Kg / Acre.
- Shelf life is very excellent.
- This sweet babby variety is suitable for fresh and processing market.
- It is suitable for long transportation.
- As well as can grow in all seasons.

SEAMONS SUGAR FACTORY

- Colour : Golden yellow kernels
- Weight : 275-300 Gm
- Shape and size : Long uniform cylindrical cobs, excellent tip filling
- Ear diameter : 1.9-2.1 Inch
- Ear length : 8-8.6 Inch

- Yield :- 56000-62000/ Hectare.
- Seed count /kg - 7600-7800.
- Rows :- 14-16 Kernels.
- Silking :- 50% Silking in 50-52 days.
- Brix :- 15-16.5%.
- Maturity days:- 70-75 Days.
- Shelf life is very excellent.
- This sugar factory variety is suitable for fresh and processing market.
- It is suitable for long transportation.
- As well as can grow in all seasons.

“SEAMON’S SQUASH”

A Wonderful Taste of
Garden Freshness !

SEAMONS **SAMRAT - 1**

- Colour : The fruit colour is a green rind with very light ridges on it
- Weight : 200–210 Gm
- Shape : Long oval in shape

-
- length is about 18–20 cm.
 - Very good fruit-bearing capacity.
 - Very good shining fruit, and can fetch a good market rate.
 - Moderate resistant against viral disease.
 - Very good for all-season cultivation.
 - This hybrid is dwarfish and early.

SEAMONS **ARYAN-70**

- Colour : The fruit colour is light green and shiny colour with light ridges
- Weight : 80–90 Gm
- Shape : Roundish oval in shape

-
- Very good fruit-bearing capacity.
 - Very firm fruit so can easily transport to long distance markets.
 - Slight ridges on the fruit.
 - Very good shining fruit.
 - Fetch a good rate in the market.
 - Moderate resistant against viral disease as well as wilt disease.
 - Very good for Winter season cultivation.

“CABBAGE WONDERFUL”

**“Exceptional Crunch,
Remarkable compactness”**

SEAMONS GREEN STAR

- Colour : The head is green coconut type
- Weight : 1-1.5 Kg
- Capacity : The field holding capacity is very good

-
- This is early variety.
 - Green Star can be ready for harvest within 60 days from transplanting.
 - It has a very good heat tolerance.
 - Moderate resistance against black rot disease.
 - Suitable season for Green Star is Kharif-Rabi.
 - Having a very good green colour and a compact head.
 - Fetch good market rate.

SEAMONS HEERA

- Colour : The head is green roundish
- Weight : 0.800-0.850 Kg
- Capacity : The field holding capacity is very good

-
- This extra early variety is ready for harvest within 45- 52 days from transplanting.
 - It has a very good heat tolerance.
 - Very good tolerant against black rot disease.
 - Very good variety for all growing seasons of cabbage.
 - Having a very good green colour and compact head.
 - Can fetch a good rate in the market.

“SEAMONS CAPSICUM”
Vibrant Color, Bold Flavor !

SEAMONS

YELLOW SUMMER

- Colour : Brilliant yellow
- Weight : 160-175 Gm
- Shape : Square-shaped fruit is very thick walled and glossy

- The plant is medium tall with large dark leaves.
- Size is around 9 cm long and having 3-4 lobes.
- The immature fruit is dark green and mature fruit gain.
- Can be harvested at about 65-70 days from sowing.
- Suitable for green & yellow purposes.

SEAMONS

ALASKA GREEN

- Colour : Dark green
- Weight : 160-180 Gm
- Plant vigor : Bushy plant having vigorous growth

- The plant is well-branched and medium tall height.
- Foliage providing fruit shelter.
- Fruit description :- Dark green thick walled and glossy.
- Fruit is 10-11 cm & 3-4 lobes.
- Can be harvested at about 65-70 days from sowing.
- It has a unique fruit colour and tastes sweet & crisp.

SEAMONS **RED BEAUTY**

- Colour : Glossy red
- Weight : 160-180 Gm
- Plant vigor : The plant is well-branched and medium tall

-
- Square-type fruit is 9.5 cm and having 3-4 lobes.
 - Can be harvested at about 70-75 days from sowing.
 - It has a unique fruit colour and tastes sweet & crisp.
 - The young fruit is green and the mature fruit becomes glossy red.

SEAMONS **MONALISA RED**

- Colour : Dark Green Fruit Convert into Glossy red
- Weight : 150-160 Gm
- Plant vigor : The plant is well-branched and medium tall

-
- Square-type fruit is 8.6 cm and having perfect four lobes.
 - Very heavy bearing and plant strength is very good.
 - Can be harvested at about 65-70 days from sowing.
 - It has a unique fruit colour and tastes sweet & crisp.
 - The young fruit is green and the mature fruit becomes glossy red.
 - Best for Export as well as local Indian Market.
 - Very good market demand.
 - Suitable for Green house / Poly house sowing purpose.

The image features two halves of a ripe papaya, cut lengthwise, revealing the bright orange-red flesh and a central cavity filled with numerous small, black, oval-shaped seeds. The papaya halves are positioned diagonally across the frame. They are set against a background of large, dark green, glossy leaves with prominent veins. The lighting is bright, highlighting the texture of the fruit and the sheen of the leaves.

SEAMON'S PAPAYA

“Tropical Sweetness, Perfectly Ripe”

SEAMONS **DOLLAR-15**

- Capacity : High productivity
- Weight : 500-750 Gm
- Plant vigor : Plant growth is vigour

-
- Early maturity.
 - Fruit rind is tough.
 - Genetic purity is up to 99%.
 - This variety is tolerant to papaya ring spot virus.
 - TSS percentage is very high (up to 15-16.5 %).
 - Good for local market as well as long distance transportation.
 - Inner flesh colour is deep yellowish with less seeds quantity.
 - Very tasty with papaya aroma.

SEAMONS **GREEN BUDDY-555**

- Capacity : High productivity
- Weight : 1.7-2.1 Kg
- Plant vigor : Plant growth is vigour

-
- This papaya variety is a bit early and vigorous.
 - It is a very productive variety.
 - Plants begin to bear fruit at 60-75 cm in height.
 - Have over 30-35 fruits per plant in each fruit-setting season.
 - The shape of fruits will be short and oblong on female plants
 - While long-shaped on bisexual plants.
 - Inner flesh is thick, orange, with 14% TSS (Brix) content and a very good aroma.
 - It has an excellent shelf life and very good product for long transportation.
 - It is very good tolerant to papaya ring spot virus.

SEAMON'S PUMPKIN
“SEAMON’S PUMPKIN”

Rich Flavor, Robust Harvest !

SEAMONS **KALANDAR**

- Colour : Dark green with white dots on it
- Weight : 3-4.5 Kg
- Shape : Flat round

-
- Excellent fruit setting.
 - Maturity days :- 80-85 Days after sowing.
 - Sowing season :- Kharif-Summer.
 - Outer skin is smooth and slightly ribbed.

SEAMONS **MASTER**

- Colour : Fruit colour is blackish green with elongated cream spots
- Capacity : High yielding capacity
- Flesh : Fruit flesh is orangish yellow

-
- Fruit shape is oval in shape.
 - Fruit colour is blackish green with elongated cream spots.
 - Maturity time is 100-110 days.
 - Good for long transportation.
 - Growing period is May-June, Sep- Oct, April-March.

“CLASSIC HONEY CARROT”

Sweetness Refined,
Naturally Delicious !

SEAMONS
CLASSIC HONEY

- Colour : Attractive orange in colour
- Diameter : 2.5–3.5 Diameter
- Shape : Cylindrical

-
- Very shiny, orange colour with less hair.
 - Maturity days 100 days after sowing.
 - Root size is 18–20 length.
 - High productivity.
 - Very good for storage upto 4 months.
 - Very good market demand.
 - Irrigation schedule must be maintained for timely harvest the crop.

SEAMONS
SINDOOR

- Colour : Attractive orange in colour
- Diameter : 2.5–3.5 Diameter
- Shape : Cylindrical

-
- Very shiny, orange colour with less hair.
 - Maturity days 100 days after sowing.
 - Root size is 18–20 length.
 - High productivity.
 - Very good for storage upto 4 months.
 - Very good market demand.
 - Irrigation schedule must be maintained for timely harvest the crop.

- Colour : Roots are pure white
- Length : 17-24 Cm

- Soft, smooth in texture.
- Moderate pungent.
- Long, thick and stumpy.
- Leaves are entire, slightly lobed.
- Dark green and upright.
- Maturity in 40-45 days.
- Suitable for all reddish growing seasons.

- Capacity : Fast-growing with large stems and thick leaves
- Plant vigor : Plants are vigorous

- This is a very good product in its segment.
- Multiple cutting coriander with good aroma.
- It is a late bolting type with bold seeds.
- It is rather compact and can be transported.
- Well over long distances.
- It is a heat tolerant variety.

“SEAMONS MARIGOLD SEEDS”

“Marigolds are the smiles
of the sun.”

SEAMONS PARAG

- Colour : Lemon yellow in colour
- Height : 95-100 Cm & tall, erect
- Flower structure : Double florets, compact and ball shaped.
- Diameter : 8-10 Cm

-
- Leaves type pinnately divided.
 - Suitability :- Good for bedding, cut flowers and round the year cultivation.
 - Maturity 45-50 days.
 - Disease resistance virus resistance.
 - Sowing season April-June / September- November.
 - Very good keeping quality, good for long transportation.

SEAMONS GUNJAN

- Colour : Lemon yellow in colour
- Height : 95-100 Cm & tall, erect
- Flower structure : Double florets, compact and ball shaped.
- Diameter : 8-10 Cm

-
- Leaves type pinnately divided.
 - Suitability :- Good for bedding, cut flowers and round the year cultivation.
 - Maturity 45-50 days.
 - Disease resistance virus resistance.
 - Sowing season April-June / September- November.
 - Very good keeping quality, good for long transportation.

SEAMONS ZAFRANI

- Colour : Yellowish Orange in colour
- Height : 85-95 Cm & tall, erect
- Flower structure : Double florets, compact and ball shaped.
- Diameter : 7-9 Cm

-
- Leaves & stem :- Deep green leaves.
 - Good branching habit for high flower production and semi ball shape.
 - Type:- Zafrani is suitable for tropical condition.
 - Suitability :- Good for bedding, cut flowers and round the year cultivation.
 - Maturity 55-60 days.
 - Disease resistance variety.
 - Sowing season :- April-June / September- November.
 - Very good keeping quality, good for long shipping.
 - Very high yield, very good marketability.

SEAMONS KESHARIYA

- Colour : Bright orange
- Height : 80-90 Cm
- Flower structure : Double florets, compact and ball shaped.
- Diameter : 8-10 Cm

-
- Leaves & stem :- Deep green leaves and pinkish stem.
 - Suitability :- Good for bedding, cut flowers and round the year cultivation.
 - Maturity 50-55 days.
 - Disease resistance variety.
 - Sowing season April-June / September-November.
 - Very good keeping quality, good for long shipping.
 - Very high yield, very good marketability.

We breed for next generation.

DSIR Recognize R&D Portfolio.

Seamons Seeds Pvt Ltd is proud to announce its official recognition by the Department of Scientific and Industrial Research (DSIR), Government of India. This prestigious certification is a testament to our unwavering commitment to innovation, quality, and sustainable agricultural solutions.

The DSIR recognition validates our efforts in research and development, advanced seed technology, and adherence to international quality standards. It positions us as a trusted partner in agricultural advancement and demonstrates our dedication to serving farmers with superior seed solutions.

This achievement opens doors to enhanced market opportunities, government incentives, and global recognition. Most importantly, it reinforces our position as a leader in scientific innovation within the agricultural sector. At Seamons Seeds, we are committed to continuous improvement and delivering excellence in every seed we produce.

Research Varieties:- Development of high-yielding hybrid varieties of Watermelon, Muskmelon, Tomatoes, Cucumbers, and Peppers that exhibit superior growth and resilience.

Disease Resistance:- Introduction of seed lines with enhanced resistance to common diseases such as powdery mildew and fusarium wilt, ensuring healthier crops and reduced reliance on chemical treatments.

Climate Adaptation:- Breeding efforts focused on producing seeds that thrive in diverse environmental conditions, from drought-tolerant strains to those that perform well in cooler climates.

Ongoing Projects:- Our Seamons R&D team is currently engaged in several exciting projects aimed at further advancing our capabilities and expanding our product range.

Sustainable Practices:- Exploration of eco-friendly seed production methods that minimize environmental impact, including the use of organic and renewable resources.

Farmer Support:- Collaborating with agricultural experts and farmers to provide comprehensive training and support, ensuring the successful implementation of our new seed varieties.

Future Directions:- Looking ahead, we are as a Seamons committed to maintaining our leadership in the vegetable seed market through continuous innovation and improvement. Our strategic priorities include.

Seamons R&D Portfolio

Investment in Technology:- Leveraging advanced technologies such as genomics, biotechnology, and precision agriculture to accelerate our breeding programs and improve seed quality.

Collaborative Research:- Partnering with leading research institutions and universities to stay at the forefront of scientific advancements and bring the latest innovations to market.

Market Expansion:- Exploring new markets and expanding our distribution network to reach more farmers globally, ensuring access to our superior vegetable seed products. We are incredibly proud of the strides we have made and remain dedicated to pushing the boundaries of what is possible in vegetable seed production. Thank you for your unwavering support and hard work in making these achievements possible.

I am glad to share some important updates on our germplasm resources for vegetable seeds, which are foundational to our research and development efforts. Germplasm is the genetic material that we use to develop new seed varieties, and it plays a crucial role in ensuring the quality, diversity, and resilience of our products.

Recent Developments:- Our Seamons R&D team has made significant progress in expanding and enhancing our germplasm collection. Here are some key highlights.

Diversity Expansion:- We have successfully acquired and integrated new germplasm from various regions, increasing our genetic diversity. This includes rare and heirloom varieties of tomatoes, peppers, cucumbers, and leafy greens, which offer unique traits and adaptability.

Advanced Characterization:- Utilizing cutting-edge genomic and phenotypic analysis, we have been able to better characterize our germplasm, identifying valuable traits such as disease resistance, drought tolerance, and nutritional content. This detailed understanding is crucial for effective breeding programs.

Pre-Breeding Programs:- Initiatives to introduce desirable traits from wild relatives and landraces into our breeding lines. This pre-breeding work is essential for developing new varieties that combine traditional resilience with modern yield and quality demands.

Seamons R&D Portfolio

Trait Discovery:- Intensive screening for traits such as pest resistance, heat tolerance, and enhanced nutritional profiles. By pinpointing these traits, we can fast-track their incorporation into our commercial varieties.

Future Directions:- To maintain our leadership in the vegetable seed industry, we are committed to further strengthening our germplasm resources through the following strategies.

Sustainable Practices:- Incorporating sustainable practices in germplasm management, including organic farming techniques and eco-friendly storage solutions. Our germplasm collection is a vital asset, underpinning our mission to develop superior vegetable seed varieties that meet the evolving needs of farmers and consumers.

I am confident that with our continued focus on innovation and collaboration, we will achieve remarkable advancements in vegetable seed production.

Thank you for your dedication and hard work in making these advancements possible. Together, we are building a more resilient and sustainable agricultural future.

Warm Regards

Mr. Narpat singh

CEO, Seamons Seeds Pvt Ltd.

Processing and Packaging Plant

Our ongoing research and development efforts in vegetable seeds production. As you know, Seamon's R&D department has been working tirelessly to innovate and enhance our product offerings to meet the growing demands of farmers and consumers alike.

Our Recent Achievements:- Our team has made significant progress in the development of new vegetable seed varieties that promise higher yields, improved resistance to pests and diseases, and better adaptability to various climatic conditions. Some of our notable achievements include.

Research Varieties:- Development of high-yielding hybrid varieties of Watermelon, Muskmelon, Tomatoes, Cucumbers, and Peppers that exhibit superior growth and resilience.

Disease Resistance:- Introduction of seed lines with enhanced resistance to common diseases such as powdery mildew and fusarium wilt, ensuring healthier crops and reduced reliance on chemical treatments.

Climate Adaptation:- Breeding efforts focus on producing seeds that thrive in diverse environmental conditions, from drought-tolerant strains to those that perform well in cooler climates.

Ongoing Projects:- Our Seamon's R&D team is currently engaged in several exciting projects aimed at further advancing our capabilities and expanding our product range.

Sustainable Practices:- Exploration of eco-friendly seed production methods that minimize environmental impact, including the use of organic and renewable resources.

Farmer Support:- Collaborating with agricultural experts and farmers to provide comprehensive training and support, ensuring the successful implementation of our new seed varieties.

Future Directions:- Looking ahead, we are as a Seamon's committed to maintaining our leadership in the vegetable seed market through continuous innovation and improvement. Our strategic priorities include.

About Our Corporate Office

Welcome to the corporate headquarters of SEAMONS SEEDS PVT LTD. Located in Mehsana, Gujarat. Our office is designed to foster innovation, collaboration, and sustainability. As a leader in the Research seeds industry, we are committed to creating a dynamic work environment that supports our mission of enhancing agricultural productivity and sustainability.

Office Environment:- Our corporate office features a modern design that incorporates open work spaces, collaborative meeting areas, and dedicated quiet zones. We believe that a flexible workspace promotes creativity and teamwork.

Our facilities include:

Innovation Labs:- Equipped with state-of-the-art technology for research and development, our labs are where our scientists and engineers work diligently to develop the next generation of high-yield hybrid seeds.

Meeting Rooms:- Multiple conference rooms outfitted with the latest audio-visual technology facilitate seamless collaboration with internal teams and external partners.

Breakout Areas:- Designed for informal meetings and brainstorming sessions, our breakout areas provide a comfortable space for employees to share ideas and innovate.

Sustainability Features:- Our office incorporates green building practices, including energy-efficient lighting, recycled materials, and a rooftop garden that helps promote bio diversity.

Corporate Culture:- At SEAMONS, our corporate culture is built on the principles of integrity, collaboration, and excellence. We value each member of our team and strive to create an inclusive environment where everyone can thrive.

Key aspects of our culture include.

Team Collaboration:- We encourage cross-departmental collaboration to enhance creativity and bring diverse perspectives to our projects.

Employee Development:- Our commitment to continuous learning is reflected in our training programs, workshops, and leadership development initiatives designed to nurture talent and drive professional growth.

Health and Well being:- We prioritize the health and well being of our employees by offering wellness programs, flexible working arrangements, and a supportive atmosphere.

SEAMON'S CUSTODIAN OF LAGACY

★★★★★ **SRI SIV SANKAR SEEDS, ANANTHAPURAMU, A.P.** – “ Seamons Seeds represents a legacy of trust that Sri Siv Sankara Seeds is profoundly honored to carry forward. Their exceptional varieties—Pitambari exotic muskmelon, Gujarat Glory, and Seamons BH-1 Bhujang—are built on decades of unwavering commitment to farmer success and agricultural integrity. This isn't just about seeds; it's about a sacred promise made to every farmer who trusts us with their harvest. and they never disappoint. Being part of this legacy as Sri Siv Sankara Seeds is a profound responsibility we take to heart. We are honored custodians of Seamons Seeds' legacy of trust.!”

★★★★★ **CHANCHAL KRUSHI KENDRA, JAIPUR, RAJASTHAN** – “ As a proud distributor of Seamons Seeds Pvt Ltd. in Jaipur, I can confidently say their parthenocarpic cucumber, Watermelon, And muskmelon varieties have revolutionized my business. The seed quality is consistently excellent with outstanding germination rates, and the plants produce abundant, uniform yields that my customers absolutely love. Seamons commitment to innovation and farmer support is unmatched in the industry. ”

★★★★★ **PATEL SEEDS AGENCY, DEESA, GUJARAT** – “ It's an absolute honor and privilege to represent Seamons Seeds at Patel Seeds Agency in Deesa. Their Khushbu Gold and Seamons BH-1 Bhujang variety is nothing short of exceptional—a testament to excellence, innovation, and unwavering commitment to quality. Every harvest season, we stand with immense pride watching our farmers achieve outstanding results with Hybrids. This isn't just a product we sell; it's a legacy of trust and superiority we're proud to champion in our region.”

★★★★★ **SIDDHI AGRO SCIENCE, INDORE, M.P.** – “Seamons Seeds has touched our hearts and transformed our lives at Siddhi Agro Science in Indore. When we started with their hybrid chilli, Bhumika tomato, Seamons BH-1 Bhujang watermelon, and Khushbu muskmelon, we weren't just buying seeds—we were investing in hope and prosperity for our farming families. They don't just sell seeds they genuinely care about our community's well-being. It's a beautiful partnership built on trust, integrity, and shared dreams. Seamons Seeds isn't just our supplier they're family. Forever grateful. ”

★★★★★ **KRANTI TRADERS, SHAMBHAJINAGAR, MAHARASHTRA** – “ Five stars for Seamons Seeds Pvt Ltd! Their muskmelon, watermelon, and chilli hybrids are game-changers for our distribution business in Maharashtra. Superior seed quality, exceptional germination, and outstanding yields that consistently exceed expectations. From field to market, these hybrids deliver premium results—this is why farmers across Shambhajnagar choose Seamons Seeds. ”

★★★★★ **REKHA AGRO SERVICE, PAVAGADA, KARNATAKA** – “ What an incredible journey began when Rekha Agro Service joined as a Seamons Seeds distributor in Pavagada, Karnataka in 2025! From the very first moment we opened Seamons' product packages, we were absolutely amazed by their quality and excellence. We've only just begun our partnership, yet we're already witnessing firsthand why farmers trust Seamons Seeds with their harvest dreams. we're confident we're building something beautiful and impactful for Karnataka's farming community. ”

★★★★★ **RAJKUMAR AGRO AGENCY, SOLAPUR, MAHARASHTRA** – “ Five stars for Seamons Seeds Pvt Ltd Their hybrid watermelon, muskmelon, marigold, ridge gourd, chilli, and tomato hybrids demonstrate exemplary agronomic excellence and superior genotypic performance for Raj Kumar Agro Agency in Solapur. Exceptional seed vigor indices, impeccable seed certification standards, and outstanding yield parameters consistently surpass horticultural benchmarks. ”

★★★★★ **SHREE AGRO AGENCY, CHOPDA, MAHARASHTRA** – “ As custodians of magnificence, we at Shree Agro Agency Chopra in Jalgaon have the profound honor of representing Seamons Seeds for eight glorious years. Every seed we distribute carries the weight of Seamons' magnificence—their unwavering commitment to perfection, their dedication to farmer success, and their relentless pursuit of horticultural. The magnificence of what we've built together with Seamons is visible in every successful crop, every prosperous harvest, every farmer's smile across Jalgaon. ”

★★★★★ **ANKUR ROPVATIKA, KANNAD, MAHARASHTRA** – “ Seamons BH-1 Bhujang watermelon, marigold, chilli hybrids, and Bhumika tomato hybrids are transformative for Ankur Ropvatika. Exceptional seed vigor, superior purity standards, and remarkable productivity indices that consistently surpass benchmarks. With robust disease resistance and optimal crop phenology, these cultivars deliver premium market-grade produce—this is why progressive farmers across Maharashtra trust Seamons Seeds.”
